

Swedecare

- experienced placement agency

Swedecare, with over 20 years in the business, is an experienced agency for placement of Swedish Au pairs, Carers, Nannies, Mother's Helps and Horse Grooms throughout the United Kingdom. Each candidate is carefully selected to fit their ideal employer with comprehensive background and reference checks.

Anne Dennemark Norton (left) was born in Stockholm and has lived in London for the last 40 years. She started her agency business, Swedecare, initially dealing with Swedish families in London wanting Au pairs and mother's helps who spoke Swedish and English. It quickly expanded as a general Au pair agency and now also provides Carers for the elderly serving the UK/Eire market.

Just by chance one of her clients who owned horses asked if she could provide the combination of an Au Pair to look after her small daughter and also help with her horses. This began a new side to her business of providing stable staff/riding instructors, etc, throughout UK/Eire. Swedecare now has clients among some of the most prestigious racing stables and show jumping and dressage establishments to whom they supply staff at various different levels of expertise.

Child Care

Whether you need an Au pair or a Nannie, Swedecare can help you find the ideal person who will fit

in with your family and lifestyle. By letting Swedecare know your preferences and needs they can put you in contact with several suitable people.

Stable staff/Horse Grooms/Combination stable staff – Au Pairs

Thanks to good contacts with some of the best equestrian schools in Sweden who are looking to place people after they have graduated and who want to come to the UK/Eire for work experience and to improve their language skills, Swedecare can offer stable staff with experienced grooms who also can ride.

Carers & Companions for the Elderly

Swedecare provides experienced carers who enable elderly to remain living in their own home. Duties normally include some shopping, light cooking, light housework and sometimes personal hygiene.
